

HM-4B series for machining high hardness steel · **HM-4B** Serie für die Hartbearbeitung

4-flute ball nose mills with long straight shank
4-Schneiden Kugelkopffräser mit Zylinderschaft

| Type Typ | Dimension(mm) Abmessungen | | | | | Teeth Zähne Z | Geometry Ausführung | Grade Sorte KMG 555 |

1. Please select machine and holder with high precision and rigidity.
2. Above table shows the standard for operations with a low change of machining load, such as Contour machining. Vibration and unusual noise may be generated if the machine rigidity and workpiece fixture stability is low, please reduce the rotating speed and feed stated above correspondingly.
3. Please use air blow or MQL (minimum oil mist cooling).
4. When inclination angle α is more than 15° , please reduce rotating speed and feed to 50%~80% of the above conditions.
5. Make overhang as short as possible if no interference.

1. Bitte präzise Maschinen und Werkzeughalter verwenden.
2. Schnittdatenempfehlung der obigen Tabelle sind für das Profilfräsen ausgelegt (leicht reduziert). Bei Vibrationen oder ungewöhnlichen Geräuschen reduzieren Sie die Schnittdaten entsprechend.
3. Bitte Luftkühlung oder MQL (Minimalmengen) benutzen
4. Wenn der Neigungswinkel α mehr als 15° beträgt, bitte die Schnittgeschwindigkeit und den Vorschub auf 50-80% der obigen Schnittdaten reduzieren.
5. Werkzeugauskragung so kurz wie möglich wählen.
